Title: PADEP Comments on SA  
Report

ARF

14 Jun 1996

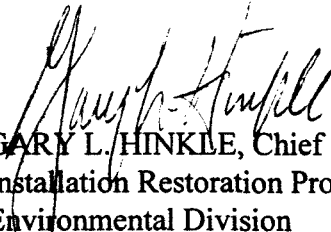

Dear Mr. Kennedy

This is a follow-on to our discussion regarding the alternatives to be evaluated in relation to the Motor Pool Area, Building 352, 111th Fighter Wing, Pennsylvania Air National Guard. Per the attached letter, the base Environmental Coordinator (EC) has reviewed the Advance Proof Final Report, which incorporates your comments, and has provided additional comments for our consideration. We have reviewed these comments, and consider them to be valid. We plan to address them in the Final Report, a copy of which will be provided to you, the state UST group, EPA (Mr. Lausch), and the base EC. This will be accomplished as soon as the associated procurement action is completed, which is expected within 60 days. Therefore, the report should be issued within 90 days.

Please note that we have determined, based on advice from our legal staff, that this is a UST project governed by the applicable state regulations and is not a CERCLA project. Therefore, we have taken steps to convert future activities from EECA tasks to Corrective Action Plan tasks. We expect this procurement action to be completed within approximately 60-90 days, in parallel with completion of the SA Report.

If there are any questions, please contact my Project Manager, Mr. Winston Crow, at (301) 836-8155 or fax no. (301) 836-8121.

Sincerely

  
GARY L. HINKLE, Chief  
Installation Restoration Program Branch  
Environmental Division
