RE: Draft Final Site Assessment Report

Dear Mr. Bullman:

For the Department I have reviewed the Draft Final Site Assessment Report on the soils and groundwater contamination in the Motor Pool Area (Bldg 352) at the Willow Grove Air Reserve Station.

Only one error was found: In the last paragraph of page 49 the 78.9 ug/g does not match the data on the corresponding data summary chart.

In all other respects the document satisfactorily describes the conditions at the site.

As discussed in our meeting of Dec. 12, 1995, it is our understanding that the Air National Guard proposes to prepare an Engineering Evaluation / Cost Analysis to remediate the contaminated soils and groundwater. The Department looks forward to reviewing that document and assisting you in its implementation.

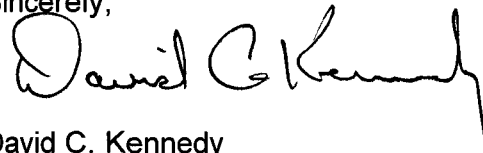

If I may be of aid please do not hesitate to call me at the above number.

Mr. George T. Bulman
